CONSTRUCTION

ITD will know more about construction impacts once design plans are finalized and a contractor is selected to complete the work. At this time, ITD anticipates:

• Construction will begin in summer 2018.
• Construction of the bridge will occur in three stages. One lane of traffic will be open over the bridge. Lane widths will vary between 14 and 19 feet.
  — Stage 1: ITD will remove and reconstruct the north side of the bridge.
  — Stage 2: ITD will remove and reconstruct the south side of the bridge.
  — Stage 3: The new pedestrian railing will be installed.
• On Idaho 55 between U.S. 95 and 4th Street, traffic will be reduced to one lane with flaggers where crews are working. Between 4th Street and Bruneau Highway, the highway will be two lanes (one in each direction).
• Access to 2nd Avenue from Idaho 55 will be limited or closed during construction.
• Other intersections will be flagged on occasion.
OVERVIEW
STAGE 1 - ESTIMATED 9 MONTHS

LEGEND

- Stage 1 - Open to use
- Permanent retaining wall
- Permanent retaining slope
- Control lane access
- Stage 1 construction
- Stage 1 travel lane
STAGE 2

LEGEND
- Gray: Existing Roadway
- Red: Temporary Roadway
- Green: Permanent Roadway
- Blue: Bridge Construction
- Yellow: Stage 2 Construction Zone
- Orange: Stage 2 Travel Lane

STAGE 2 - ESTIMATED 9 MONTHS
STAGE 3

STATION 4: CONSTRUCTION

STAGE 3 - ESTIMATED 2 MONTHS

LEGEND
PARK ACCESS DURING CONSTRUCTION

LEGEND

For both Stage 1 & Stage 2:
- Traffic from Canyon County - Utilize local city of Marsing roads to access park.
- Traffic from park - Utilize local city of Marsing roads to access SH-65 to Canyon County.

Stage 1 - Estimated 9 Months

Stage 2 - Estimated 9 Months

Limited access under bridge during construction.

Temporary signal.
