

US-12 AND 21ST STREET IMPROVEMENTS: PROJECT OVERVIEW

January 2019

Improvements to US-12 and 21st Street in Lewiston are designed to improve safety and traffic flow.

Changes to the intersection include:

- Closure of the G Street and 21st Street intersection
- Dual left turns permitted in all directions
- Widened sidewalk on the east side of 21st Street and a signal-controlled crosswalk from 21st Street and the park
- Concrete pavement, rather than asphalt, to resist wear from heavier traffic

Work is scheduled to start in March and last until October. Some work will require traffic to be detoured through residential areas. To learn more, visit itdprojects.org.
