

POCATELLO AVE/I-86B INTERSECTION

IMPROVEMENT PROJECT

Good morning,

Many of you joined us in November for Community Workshop #3 about the I-86B/ Pocatello Avenue intersection project in American Falls. ITD received detailed feedback about the recommended improvements to this intersection. A summary of the workshop and discussion is [attached](#) for your reference.

ITD is in the process of preparing final design plans and will share these with the public later this year. At this time, ITD anticipates that:

- The new interchange design will be a roundabout.
- A turn lane from Fairgrounds Road will be included in the design.
- The speed limit will be re-evaluated.
- ITD will verify that the roundabout size is sufficient for 53-foot trailers.

Community input has played a key role in the decision to re-evaluate design options for this intersection over the past year. We appreciate your involvement. All workshop presentations and maps for this project are posted on the [project website](#). If you have questions about this project, you are always welcome to contact me.

Sincerely,
Dan Harelson
ITD District 5 Engineering Manager
