The Idaho Transportation Department is working with the City of New Meadows to improve US-95 in New Meadows and replace the city’s water main this summer. The project will result in a smoother, safer road surface for many years.

The project includes:

- Replacing the old road base and pavement on US-95 between End Road and Idaho 55.
- Replacing the city water main, located under the road.
- Keeping street parking and the existing number of lanes.

Construction will begin in early June and is expected to be completed by the end of the summer.

All lanes of US-95 will be open on the weekend. Work hours are 7 a.m. – 7 p.m. Monday – Thursday and 7 a.m. – 12 p.m. on Friday.

Business access will be open throughout construction.

Construction will be completed in 1-2 block sections. While each block is under construction:

- All traffic will share one side of US-95 (either northbound or southbound) while crews work on the other side. Flaggers will direct traffic.
- Motorists may drive on a gravel road surface.
- On-street parking will be limited 24 hours a day in the work area.
- Work may be noisy and dusty.
- Pedestrian detours will be in place.

**CITY WATER CUSTOMERS:** City water service may be interrupted during this project. You will be notified of scheduled interruptions in advance. If you have questions about city water service, please contact New Meadows City Hall at (208) 347-2171.

The southbound lanes of US-95 will be reconstructed first. Crews will start at End Road and work east to the junction of Idaho 55. The northbound lanes will be reconstructed once the southbound lanes are complete.
