

I-84 TO WEST STATE STREET IN EAGLE

The Idaho Transportation Department is developing long-term plans to improve Idaho 44 from Caldwell to Eagle. The plan will identify specific actions for improving safety, addressing mobility and supporting economic opportunities along Idaho 44 between I-84 in Caldwell and West State Street in Eagle.

The Idaho 44, I-84 to West State Street in Eagle project will build upon ITD's earlier corridor work and includes:

- Updating traffic projections, through 2045.
- Developing concept designs for high volume intersections, travel lanes and any necessary shifts of the roadway.
- Completing an environmental analysis of how the design concepts would affect noise, air quality and other environmental factors along the corridor.

PROJECT AND SCHEDULE

2019–2020	Update traffic study
	Continue environmental analysis
	Confirm concept designs
	Hold public meeting
2021	Complete environmental analysis
	Confirm proposed improvements
2022	Hold public hearing
	Finalize environmental analysis and proposed improvements

Final design and construction will occur as funding becomes available. ITD anticipates the first improvements will be constructed in 2023 and 2024.

COMMUNITY INVOLVEMENT

Community involvement is important to the Idaho Transportation Department and to the success of this project. ITD will provide multiple opportunities for communities to provide input on proposed improvements to Idaho 44.
