

2022 – 2023 Construction Projects

The Idaho Transportation Department is continuing a major effort to repair and maintain Interstate 15 in eastern Idaho.

SCAN ME

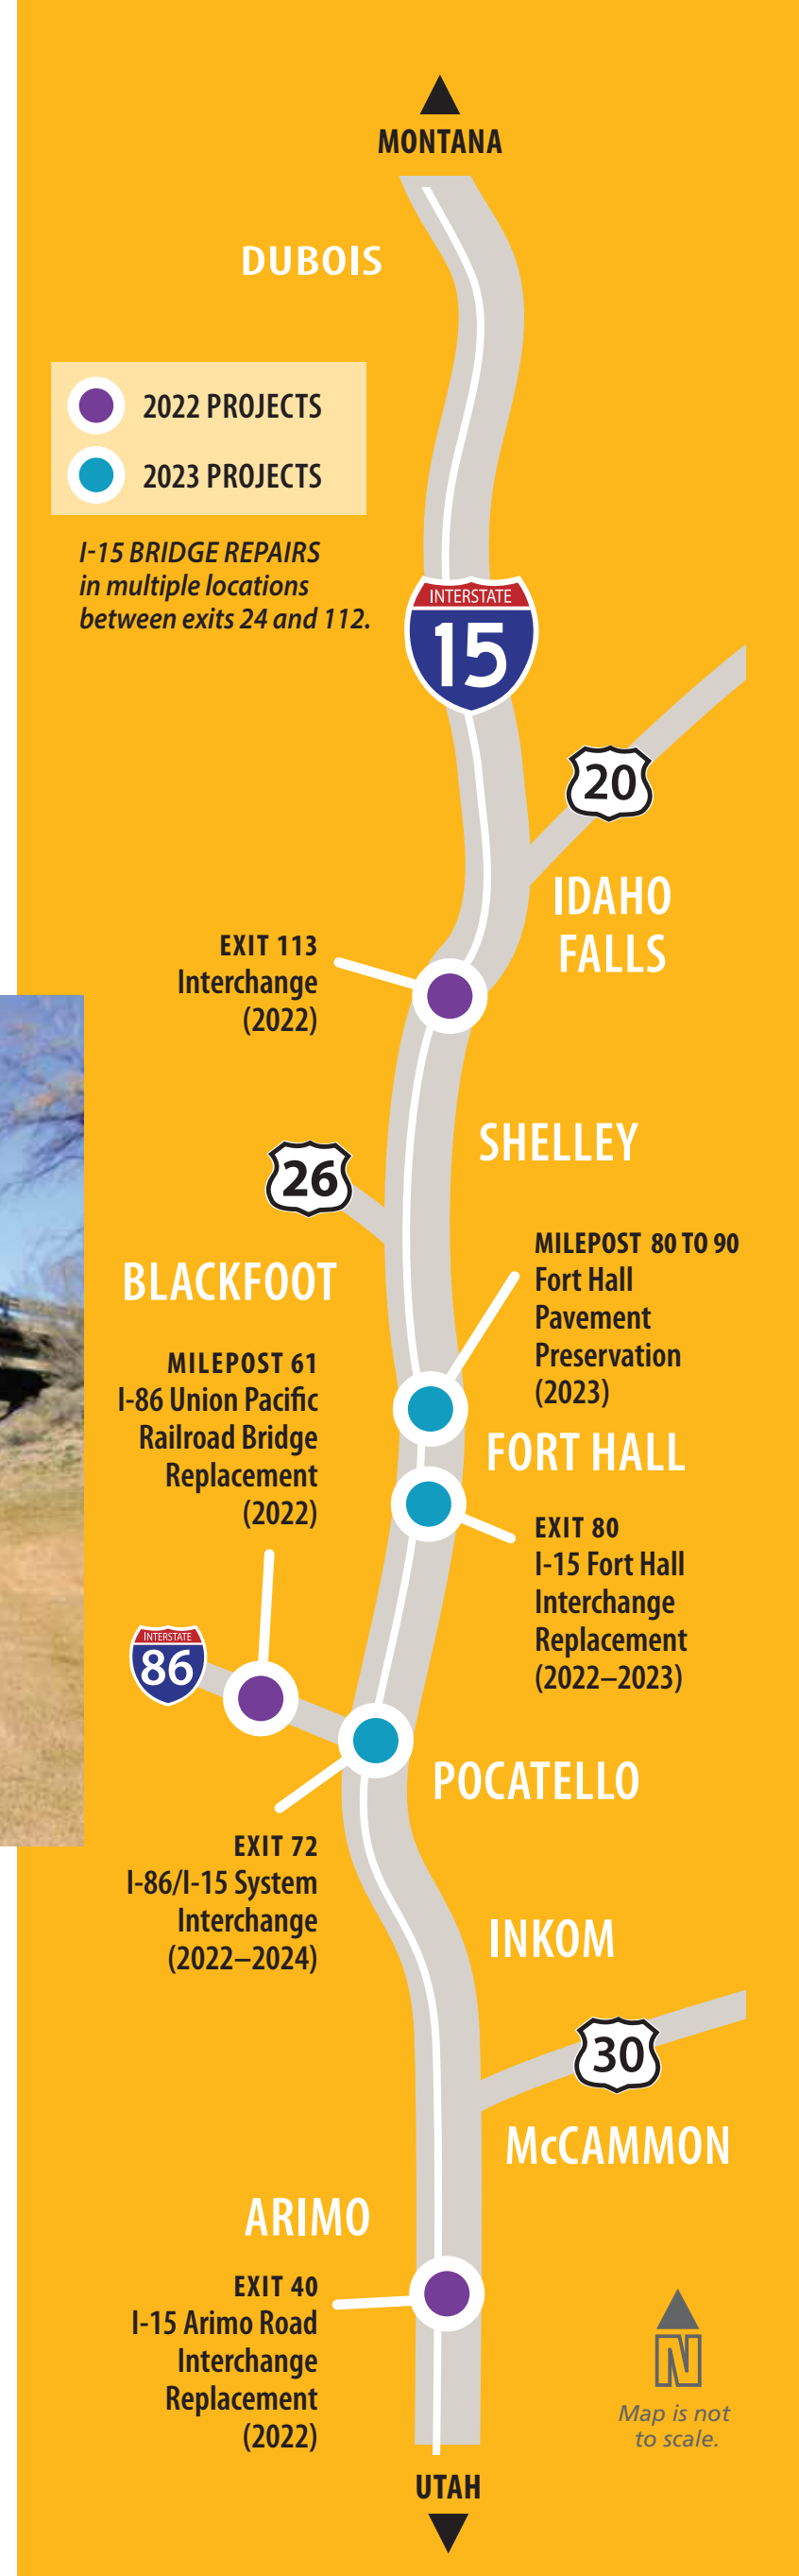

Why? Most of I-15 was constructed in the 1960s and 1970s. While yearly maintenance is helpful, any interstate requires major rehabilitation after more than 40 years. Over the last several years, ITD has replaced and repaired many miles of pavement, bridges and interchanges. Several more projects are ahead.
